

MEMORANDUM FOR THE RECORD:

Security implications of this Agency's participation in the proposed operation of centrally controlled motor pools were pointed out and discussed with Mr. J. B. Hanson, GSA, November 12, 1954. As stated in the attached letter, it was agreed that the Agency would not be requested to participate further in general discussion nor the studies being conducted by GSA. Mr. Hanson explained in some detail the plans for GSA's overall operations, and pointed out a few areas where they may in the future be in a position to serve the Agency advantageously. Mr. Hanson was advised that in this event we would be available to discuss any proposal he may have; however, the security of the Agency's operations must be the first consideration.

It is recommended that no further action be taken at this time, but that any further proposals of GSA be considered when presented.

  
Acting Chief, Transportation Division
